The Office Action mailed on January 8, 2008 and issued in corresponding Japanese Patent Application No. 2004-570564, cited Japanese Patent Publication Nos. 2001-243307 (Reference AG) and 2002-251353 (Reference AH).

Japanese Patent Publication Nos. 2002-216021, 2002-259253 and 2002-304408, also cited in the above-mentioned Office Action, were previously submitted with an Information Disclosure Statement filed in the U.S. Patent and Trademark Office on October 7, 2005.

In JP2001-243307 (Reference AG), Paragraphs [0081] and [0082] as translated to English, read as follows:

[0081] Accumulated information consists of: contents information that is used as publication contents; and publishing area information that designates a publishing area. Contents information is produced by a character, an image and a sound so that the contents information may be outputted to the output portion 13 of the terminal device 10 mounted on the rental vehicle.

[0082] Publishing area information may be designated by a territory or a point. Designation by a territory has a prescribed territory as a designated range. When it is judged that the rental vehicle enters within the territory, the rental vehicle is supplied with the information to that effect in accordance with the information retrieval starting command. On the other hand, designation by a point is conducted by designating, as a designated range, a spot or an extremely specified area. When it is recognized that the designated point is contained within the area located in a prescribed distance from the present position which is indicated by a present position signal, the rental vehicle is supplied with the information to that effect in accordance with the information retrieval starting command.
